Selected Seeds for Hawaii's Needs

Black
Beauty

Scarlet Globe
Radish

Bountiful Bean

All strains of
VEGETABLE SEED
offered by us have been
selected for our Island
growing conditions

FOREWORD

In presenting this Tenth Anniversary Catalogue we take the opportunity of thanking our many friends throughout the Pacific Islands for their generous support.

We say "Pacific Islands" purposely for, during the past few months, we have had the pleasure of filling orders destined to the Solomons, Gilberts, Marshalls, Carolines and Marianas, and we hope that our seeds will soon be flying to the Philippines to help rehabilitate that great group of islands.

We pledged ourselves ten years ago to a policy of helping every grower find the proper variety and strain for his particular needs; to secure for him pure seed from reliable sources; to properly care for and store our seed stocks so that they would not lose their viability and to give careful, prompt attention to every order, large or small.

The maintenance of this policy has paid us big dividends. We have made several thousand good friends and customers and today, as we enter our eleventh year in business, we reiterate our pledge.

Mahalo Nui Loa!

HONOLULU SEED COMPANY.

PLANTING TABLE

Species	Seed for 100 ft. row	Seed for one acre	† Inches between rows	Inches apart in row	‡ Planting depth, inches
Beans, Bush	1 lb.	50-60 lbs.	24-30	2-3	1½-2
Beans, Pole	1 lb.	30-35 lbs.	36-48	6-8	1½-2

PRICE INFORMATION

Because of war conditions we have not attempted to show prices in this catalogue. We issue from time to time a combination Price List and Order Blank. A postal will bring your copy by return mail.

BEANS—Bush

Plant only in warm, well-prepared soil, about 4" apart, 1½"-2" deep. Under hand cultivation and in poor soil rows may be 18"-24" apart; in rich fields under horse or tractor cultivation, 30"-36" Cultivate only before blooming and never when wet. Pick frequently as pods approach maturity, to get full yield. Plant a succession every two weeks to ensure supplies throughout the season. Allow 1 lb. for every 100 ft. of row; about 100 lbs. per acre.

Dwarf Snap Green Pods

Bountiful

48 days

Very popular bean for early garden snaps. Plant is vigorous grower and prolific bearer of pods 6 to 7 in. long—straight broad and thick-flat. Stringless, brittle, tender and of fine quality. Seeds solid yellow.

Plentiful

51 days

Classified as a black seeded Bountiful but matures about 3 days later than Bountiful. Plants strong, vigorous, productive. Pods flat, light green, quite straight, stringless. Seeds black.

Dwarf Wax Sorts

Pencil Pod Black Wax

55 days

Bushy plants about 15 in. high, bear large number of round, thick, stringless pods 6 to 7 in. long, of excellent quality. Many think it the best variety for market and home gardens. Seed black.

Round Pod Kidney Wax

52 days

Especially fine for home gardens and for canning. Plants of medium size, prolific. Pods 5½ to 6 in. long, round, fleshy, brittle, stringless, and of fine quality. Seed white with black eye, kidney shaped.

BEANS—Pole

Kentucky Wonder

65 days

A very popular variety and unexcelled for home and market garden. Excellent climber, heavy producer. Bears green pods in large clusters, nearly round, often reaching 10 in. in length, curved and twisted. Pods are fleshy, brittle, tender and slightly stringy. Seed fawn colored.

Scarlet Runner

64 days

An old favorite in the New England States. Pods dark green, 5 to 6 in. long, contain 3 to 4 beans half-round, broad, stringy. Valuable as a green shell bean and for ornamental purposes. Seeds purple splashed with violet.

Yard Long

70 days

Similar in appearance to the common cow-pea used in the South. Pods 8 to 10 inches long, oval in section, fleshy fiberless and tender with good quality. Seed is red-brown with black circle around the eye.

Bountiful Bush

BEANS—Pole Lima**King of the Garden Lima 88 days**

Splendid climber, heavy producer. Straight pods, 6 in. long with 4 to 5 beans of good quality. An improved form of Large White Lima. Color of seed, white.

Dwarf or Bush Lima**Fordhook Bush (Potato Lima Type) 75 days**

Plants strong, erect, bearing pods in clusters of from four to eight. Pods measure 4 to 5½ in. long, and contain three to five large thick green beans. Seed white.

Henderson's (Baby Lima) 65 days

Plant medium large, very productive. Small pods, 3 in. long, contain 3 to 4 green shell beans of very fine quality. Plants bear continuously. Seed white. Bush form of Sieva or butterbean.

BEETS—Garden Varieties**Detroit Dark Red 58 days**

Globe shaped root, dark blood red color, smooth skin. Flesh uniform in color and remains tender and of highest quality until roots are full grown. Small collar and tap root. Deservedly one of the most popular for home and market garden, shipping and canning.

Early Wonder, Dark Strain 52 days

A desirable early table beet. Flattened globe-shape, medium collar, tap root and leaves. Bright red skin, vermilion red flesh zoned with lighter red. Sweet, tender.

BROCCOLI**Italian Green Sprouting 70 days**

The best sprouting broccoli for home and market garden. Erect plant with central large cluster of flower buds which are deep green. Smaller clusters on the side stems. By successive planting it may be enjoyed right up to freezing weather.

BRUSSELS SPROUTS**Long Island Improved 90 days**

Dwarf, compact, uniform size plants about 20 inches tall. Produces cabbage-like sprouts 1¼ to 1½ inches in diameter, maturing in succession. One of the most dependable varieties.

CABBAGE**Copenhagen Market 68 days**

Plants compact with short stems and hard, round heads weighing 3 to 4 lbs. Uniform in size and of good keeping qualities. Excellent for early market and early kraut.

Golden Acre 65 days

An extra early cabbage producing a uniform, round, tightly folded, well balanced head of excellent quality. Heads weigh about 3 lbs., short stem. A fine variety for home and market garden.

Yellows Resistant Varieties**Marion Market 80 days**

A selection of Copenhagen Market. It is ten days later in maturity than Copenhagen Market, forms a larger plant. Head is nearly round. A very heavy yielder, excellent for kraut.

Miscellaneous Varieties**Chinese Cabbage—Wong Bok 80 days**

Heads 8 to 10 in. tall; rather broad. Leaves tightly folded, blanching the interior, making it crisp, tender and of delicious quality. Gaining in popularity each year. For salad, slaw and greens.

Chinese Cabbage—Chihili 75 days

The taller of two popular types. Heads 18 in. to 20 in., 4 in. to 5 in. at base tapering to tip. The outer leaves dark green, inner white, tender and sweet.

Mammoth Rock Red 95 days

The largest of the red cabbages, the round heads weighing 6 to 8 lbs. Intense dark red color. A sure header.

CANTALOUPE

Imperial No. 5

80 days

This improved strain has almost entirely replaced the older Hale's Best. It is the earliest and deservedly one of the most popular shipping cantaloupes, oval, sweet and of very fine quality.

CARROT

Chantenay Red-Cored (Coreless)

68 days

Roots 5 to 6 in. long, 2 to 2½ in. thick at the crown. Color deep orange-red. A fine medium early, half-long, stump-rooted carrot. Core reddish orange.

Improved Danvers, Half Long

75 days

A beautiful, half-long, tapering, stump-rooted carrot. Color rich dark orange. Large, smooth, flesh fine texture and very little core. Length, 6 inches, diameter, 2 to 2½ inches near crown. Good keeper.

Oxheart or Guerande

75 days

An excellent second-early sort, for home use or stock feed. Heart shape, 3 to 4 in. long and 2 in. in diameter with bright orange flesh. Easily harvested. Adapted to shallow soils and a good keeper.

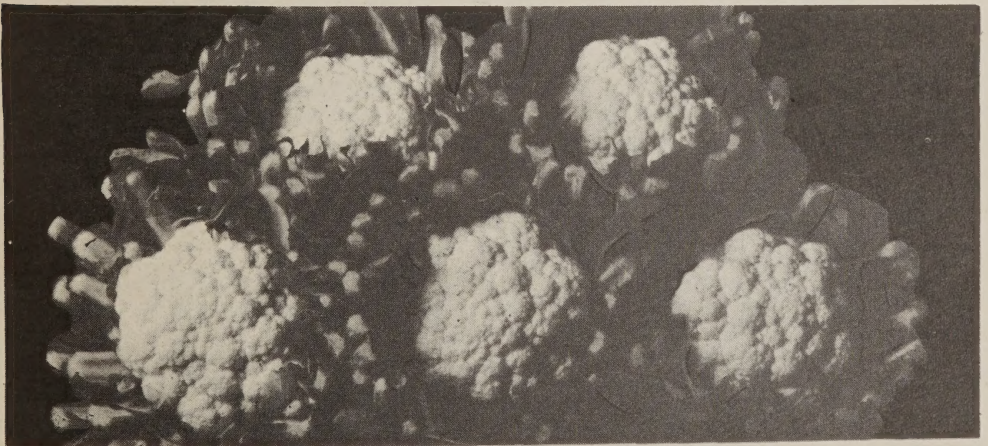

*Carrot—Red Cored
Chantenay*

CAULIFLOWER

Snowball

55 days

The standard variety for commercial purposes. Dwarf and compact in growth. Fine, solid, round heads, pure white. A good keeper. Weight of heads, 2 lbs.

Cauliflower— Early Snowball

CELERY

Golden Plume

115 days

A desirable sort for home and market gardens. It is free from strings and hollow stalks. Semi-dwarf plants, with thick stalks, very full heart and blanches to a beautiful golden yellow. Its attractive appearance and fine quality make it very desirable for market gardeners.

Tall Utah

126 days

A green variety recommended for fall use. Stocky and full hearted. Stems thick, solid, broad, rounded and of fine quality. The most popular green variety today.

CHARD—See Swiss Chard

CORN

Stowell's Evergreen

100 days

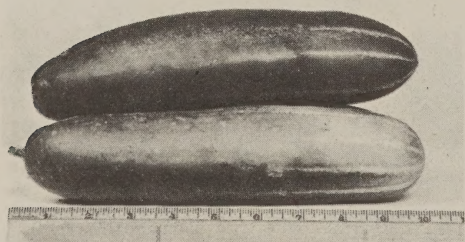

This is the old standard variety for home gardens, market gardens and canners. Stalks 7 to 8 ft.; ears 8 in. long with 16 or more rows of the finest, sugary, white grains. Very productive.

U.S.D.A. 34

95 days

The only mosaic resistant sweet corn that we know of. Introduced here about 1935, it is by far the best producer and most popular corn for table use in the islands.

CUCUMBER

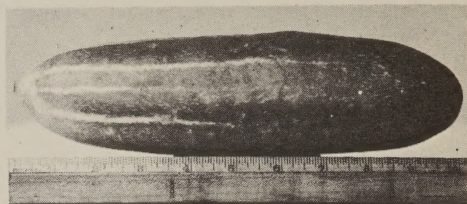

*Cucumber—
Straight-8*

Straight-8

63 days

An excellent white spine, slicing variety developed and introduced by Ferry-Morse. It was awarded the All-American Gold

Medal in 1935. Desirable for shipping, market garden or home garden trade. The fruit is 8 to 9 in. long and $1\frac{1}{2}$ in. thick. Ends are rounded. It is very symmetrical, not tapering from either end. The color is dark green in the shipping stage. Plants quite vigorous.

*Cucumber—
Colorado*

Colorado

63 days

An attractive slicing variety for market gardens and for shipping. Fruits dark green, cylindrical, tapering at stem end, small seed area. $8\frac{1}{2}$ in. long, $2\frac{1}{4}$ inches in diameter. White spine type.

EGG PLANT

Black Beauty

80 days

An early market variety. Color, jet black. Nearly round in shape, average weight 2 to 3 lbs. 4 to 6 fruits on a plant. Plants 24 to 30 in. tall.

New York Improved Spineless

Fruits a little later and larger than Black Beauty. A popular variety.

Ft. Myers Market

80 days

Large oval fruits of deep purple color and extremely smooth skin. Of considerable resistance to disease and excessive heat as is characteristic of the high bush type.

ENDIVE

Green Curled, White Ribbed

95 days

Beautiful dark green, curly leaves are finely cut, giving the plant a feathery effect. Sturdy growth, producing circular plants often measuring 15 or more in. in diameter. Requires good rich soil. Rich green in color, blanching to creamy white.

KALE or BORECOLE

A Non-Heading Variety of the Cabbage Family—For Greens

Dwarf Green Curled**55 days**

Very hardy, productive variety of excellent flavor. Low-growing, compact plants with finely curled, deep yellowish foliage.

Tall Green Curled**60 days**

Grows about 2 feet high with an abundance of dark yellowish-green leaves, which are very curly and wrinkled. Quite hardy.

KOHL RABI

A member of the Cabbage family with an edible, turnip-like bulb growing above ground. More delicate in flavor than turnips.

Early Purple Vienna**60 days**

Small plants with purple-stained, dark green leaves. Flattened globe-shape bulbs, which should be eaten when about 2 in. in diameter. Skin purple. Flesh white, mild, crisp and tender.

Early White Vienna**55 days**

White bulbs, tinged with green. Small leaves. Tops 8 to 10 in. long. Flesh white, of delicate flavor. A desirable sort for forcing. Eat bulbs when about 2 in. in diameter.

LEEK**Large American Flag****115 days**

Quick, strong growth, producing long stems of uniform shape and size, 2 in. through and 10 in. long. They blanch beautifully white and are of mild flavor. The Leek is closely allied to the onion, but milder in flavor. Used mainly in flavoring soups.

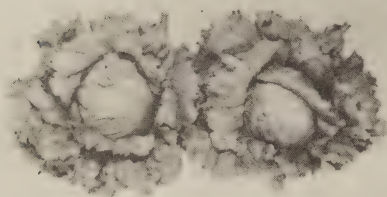

LETTUCE**Great Lakes****82 days**

All-American award in 1943. Seed now available. Especially adapted to warm weather, heads nicely, similar in appearance to Imperial types. This variety tried in Hawaii shows great promise for our climate, especially summer planting.

Great Lakes Lettuce

LETTUCE

Mignonette (Commonly known in Hawaii as Manoa Lettuce) 67 days

Leafy, with very small head but does well in summer where other types will not grow.

Manoa Special (Green Mignonette) 60 days

This is an improved type which became very popular during the last two years. Heads larger than Mignonette. Is the best warm weather lettuce so far found but may be replaced by Great Lakes.

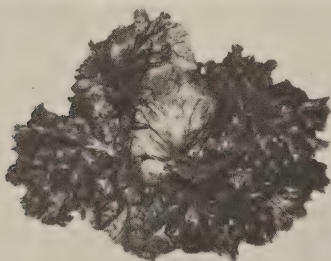

*Lettuce—
Imperial 615*

Imperial No. 615 86 days

A strain of No. 152 which does not develop suckers, used for winter cropping.

Imperial No. 152 80 days

Of the New York type, with solid, firm, medium heads; and resistant to brown blight.

*Lettuce—
Imperial 55*

Imperial 55 84 days

This is a strain very similar to Imperial 847 and stands up well in summer weather. Is brown blight resistant and has proved a very valuable summer variety in many parts of the Islands.

Imperial No. 847 84 days

A brown-blight-resisting variety which stands up in summer weather and resists tip-burn. Medium large, hard heads well covered by outer leaves. Black seed.

MUSTARD

Florida Broad Leaf

A vigorous, large leaf variety that grows fast but stands longer than most varieties before bolting to seed. The leaves are large, yellowish-green in color; nearly smooth without fringing. The midrib is a lighter shade of green.

Smooth Leaf, Large Broad Leaf Chinese

Large broad oval leaves of deep green color with a white midrib. A vigorous variety.

Kai Choy (also known as Chinese Green Mustard Cabbage)

A tall vigorously growing sort with large green slightly crumpled leaf and has a mildly pungent flavor.

Pak Choy (White Mustard Cabbage)

Quick growing variety particularly suited to local climate. Leaves oblong, thick, smooth dark green with white ribs. Most useful all-purpose green.

WE STRONGLY RECOMMEND

**VIGORO
FERTILIZER**

THE COMPLETE PLANT FOOD

OKRA**Extra Early Dwarf Green 50 days**

This plant grows about 2 feet high with many branches. The large green, tender pods are thickly set on the plant. Pods 5 to 7 in. long.

Mammoth Long Green Podded (Perkins) 55 days

A very large plant, growing 3 to 4 ft. high in Hawaii and covered with deep dark green pods frequently 7 to 8 in. long, ribbed and tapered.

ONION**Bermuda, Light Yellow Skin 92 days**

This variety has a light yellow or straw colored skin with white flesh. Used extensively in the South, especially in the onion growing districts of Texas. A flat, thin necked onion of very mild and pleasant flavor. Early and uniform in maturity.

Sweet Spanish—Utah Strain 110 days

A large, globular, yellow variety of Spanish origin. Golden yellow skin and white, very sweet flesh. Excellent for shipping and fall storage.

White Portugal or American Silver Skin 100 days

A white onion used widely for sets, pickling onions, mature bulbs and bunching onions. Medium size, flat, deep, pure white bulbs with white fine grained flesh.

Evergreen White Bunching

This is a special seed grown for us in Connecticut. Pronounced by growers who have tried it here in Hawaii as a very fine variety of onion for bunching. Does well on all Islands.

PARSLEY**Dark Moss Curled 70 days**

This is a vigorous growing, compact, productive sort. Leaves are very dark green in color, finely cut and so thickly curled that a plant resembles a bunch of moss. A home and market garden variety, excellent for garnishing and decoration.

PARSNIP**Improved Hollow Crown or Guernsey 95 days**

The standard variety. Long white roots, tender, sugary. Roots 12 to 15 in. long, 3 in. thick at shoulder. Tapered and smooth.

*Improved
Hollow Crown*

PEAS**Melting Sugar, Edible Pod White Seed 75 days**

Vines 4 to 5 ft. Similar to the gray seeded variety in growth. Should be broken and cooked, pods and all, like snap beans.

Dwarf Gray Sugar, Edible Pod 75 days

Vines 24 to 30 in. high with an abundance of medium sized sweet and tender pods, seed gray mottled in appearance. To be prepared for the table in the same manner as snap beans.

Alderman 75 days

A giant podded variety of the "Telephone" group. Vines $4\frac{1}{2}$ to 5 ft. tall, dark green. Pods dark green, tapered, $4\frac{1}{2}$ to $5\frac{1}{2}$ in. long, $\frac{7}{8}$ in. wide and contain 8 to 10 peas. Recommended for home and market gardens and shipping.

PEPPER**California Wonder 75 days**

The most popular, widely used and finest of the mild flavored large peppers. Fruits four lobed, when young, $4\frac{1}{2}$ in. long, 4 in. in diameter. Has very thick walls, the green changing a crimson when ripe. Excellent for shipping, home or market gardening.

World Beater, Selected Strain 75 days

A very excellent second early variety. It was selected from a cross between Chinese Giant and Ruby King. Fruits are large, four pointed, thick walled. The color is dark emerald green. Plants thrifty, vigorous and heavy producers. This variety is very popular as a shipping variety from Florida and East Coast areas and for market and home gardens.

PUMPKIN**Japanese Pie****Japanese Pie 108 days**

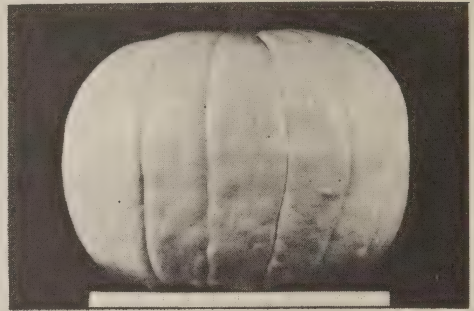

Earlier and larger than the Cushaws but resembles them in shape. Dark green skin with lighter green stripes. Good quality, deep yellow flesh. Weight about 12 lbs. Seeds have unique markings. A good variety for canning and stock feed.

Kentucky Field 118 days

A standard large pumpkin for pies and for stock food. Large, round, flattened, with broad ribs. Size 12 by 7 in. Skin creamy buff. Flesh is yellow, fine grained and very thick. The standard variety for canning.

King of the Mammoths 118 days

This is the largest pumpkin, often weighing 75 to 100 lbs. Productive and of fine

PUMPKIN**Connecticut Field**

feeding value. Grown largely for stock food but is also much used for pies. Fruits round, flattened and slightly ribbed. Skin yellow and mottled with salmon orange; flesh deep yellow and very thick. Size 24 by 18 in.

Connecticut Field 115 days

A large, rich, smooth, orange-yellow pumpkin, used extensively for canning, very popular for pies and excellent for stock feed. Grown largely in corn fields. Shape slightly oval. Can be grown anywhere.

RADISH**California Mammoth White 55 days**

Largest of all winter radishes and a favorite with the Chinese gardeners in California. Root grows 8 in. long and 2 to 3 in. in diameter. Pure white skin and flesh. May be used in all stages of growth. Flesh is solid, crisp and mildly pungent.

White Icicle 30 days

Roots 5 to 6 in. long and 1 in. thick. Pure white, with small tops. Usually marketed when about $\frac{1}{2}$ in. in diameter. Equally suitable for outdoor planting or forcing under glass. The most popular white home garden variety.

Chinese White Winter (Celestial) 60 days

Roots large, 8" long; $2\frac{1}{2}$ "-3" in diameter, cylindrical, with heavy shoulder; flesh white, crisp, rather mild in flavor.

RADISH*Early
Scarlet Globe***Early Scarlet Globe 24 days**

A sort which is equally valuable for outdoor planting and for forcing. Roots are of the broad-olive shape. At $\frac{3}{4}$ in. in diameter it is at its best. Small tops. Skin bright scarlet. Flesh white and crisp.

Sparkler 25 days

Similar to Early Scarlet Turnip White Tipped, but with a larger white area around tip. Roots almost globe shaped, upper and greater part being bright scarlet. Tops small. Roots remain solid, crisp and sweet even when fully developed.

RUTABAGA**American Purple Top 90 days**

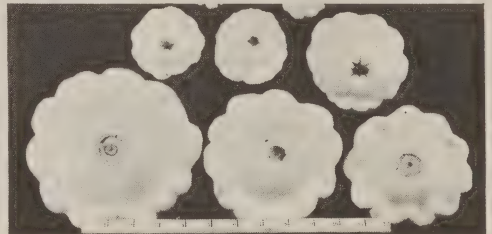

The standard variety grown for home use, market and storage. Roots large and globular, deep purplish red above ground, light yellow below, with medium short neck. Flesh a creamy yellow, of finest texture and flavor. A good yielder and keeper.

SPINACH**New Zealand 70 days**

The variety which endures heat and hence is an ideal variety for summer use. It thrives in almost all soils. The leaves are comparatively small, broad and pointed, but the plant is large and spreading. The tender leafy shoots may be cut throughout the summer. This plant is not a real member of the spinach family. Seeds large, irregular.

Prickly Winter 45 days

Plants large, vigorous and hardy. Leaves thick, medium sized, dark green. Usually planted in the Fall in the Southwest. Seeds prickly.

SQUASH—Summer Varieties**Benning's Green Tint 55 days**

A green Tinted Scallop squash, warted and turning yellowish-buff at maturity.

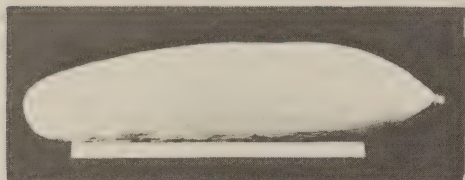

Giant Summer Crookneck (Bush) 55 days

A summer sort for home, market garden and shipping. Large fruits, 18 to 24 inches.

*Zucchini
Black***ZUCCHINI—Black****Black Zucchini 62 days**

Developed from Italian Marrow; notably popular in the West and South. Fruits 5-6 lb., cylindrical, long, smooth, dark green-black; flesh greenish white at eating stage and of good flavor.

SQUASH—Winter Varieties

Banana
—Pink

Banana

110 days

Cylindrical fruits, usually 20 to 24 in. long and 6 in. in diameter. The skin is smooth and greenish gray, with thin, brittle rind. The orange-yellow flesh is firm and solid, free from fibre or stringiness and of delicious flavor. Excellent for pies. Very productive.

Blue Hubbard

110 days

The Blue Hubbard is a distinct variety resembling the True Original Hubbard in size and shape, but the color is a clear blue gray. Flesh is bright yellow, thick, fine grained, very dry and sweet. Splendid for pies. A good keeper.

Blue Hubbard

Table Queen, Des Moines or Acorn

80 days

An excellent table squash. The fruits are about the size of a cocoanut, and half of one, baked, serves one person amply. The shell is smooth, and dark green, deeply furrowed, keeping as well as the Hubbards. Flesh is rich orange-yellow, cooking as dry and sweet as a sweet potato. An enormous yielder, a few hills furnishing an ample supply for a good sized family.

SWISS CHARD

Dark Green, White Ribbed

50-55 days

Leaves ready for use in about 7 weeks—and thereafter until frost. A popular variety for home and market garden. Grows about 24 in. tall. The leaves grow large and upright and as the outer leaves are cut more come from the center. The midrib or center stem of each leaf is large and almost white. After trimming it can be cooked and served like asparagus. The leaf part is cooked like spinach or turnip greens.

Rhubarb Chard

60 days

A delicious vegetable, possessing such beauty that it may well be used in flower borders and frequently is seen, both leaves and stalk, in flower arrangements. It is as a tasty cooked vegetable that it has won its greatest fame. The bright, translucent, crimson stalks alone may be used, or only the green leaves cooked separately, or both together. Either way, you have a delicious cooked vegetable treat in store for you. Grows to maturity in 60 days.

TOMATO

Break O'Day

70 days

A new variety developed by the U. S. Dept. of Agriculture. Fruits scarlet, globe shaped, very solid. Borne in clusters on rather open vines. Excellent shipper. Disease resistant. Free from cracking.

Pritchard (Wilt Resistant)

78 days

A second early, scarlet-fruited variety. Disease resistant. Vigorous and productive. Similar to Marglobe. Vine shorter, fruit slightly flatter. Interior color bright scarlet.

Victor

68 days

A new, first early, self-topping variety developed by Dr. A. F. Yeager of Michigan State College. Plants compact with scant open foliage—slightly larger than Bison. Fruits deep globe, smooth, very light green when young, ripening evenly to a bright red completely up to stem. Fruits are larger, smoother, deeper and better colored than Bison.

TOMATO

Bounty Tomato

Bounty

61 days

Plants are small and suitable to close planting. Self pruning type well adapted to dry climate. Scarlet fruit—smooth, deep and remarkably free from stem cracks. Very popular in all Hawaiian Islands.

Fruits largely rectangular, $3\frac{1}{2}$ in. long by $1\frac{1}{2}$ in., two-celled, borne in clusters, deep red, with little juice and of very mild flavor. The Asgrow strain is notably thick, uniform and solid.

Marglobe

77 days

Introduced by the U. S. Dept. of Agriculture in 1925, this main crop variety has come into wide use by truckers and shippers, and in some sections by canners. Plant vigorous, with heavy foliage, resistant to fusarium wilt and nail-head rust; moderately productive. Fruits medium large, nearly globular, deep red, smooth, solid, with thick walls and cross-sections; of fine quality.

San Marzano (Improved King Humbert)

80 days

A small fruited variety used for canning solid pack and for puree, also for preserves. Plant medium, rather open, very prolific.

Valiant

75 days

Vigorous growing plants. Prolific bearer; deep red large fruit, fairly thick skin. Also popular in Hawaiian Islands.

For a Garden Free from Pests

DX-ROTENONE

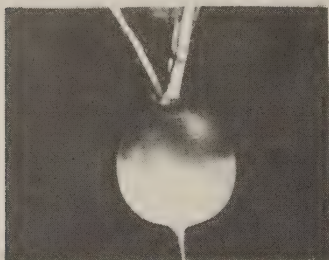

controls chewing and sucking insects

DX-SULFOCID

TURNIP

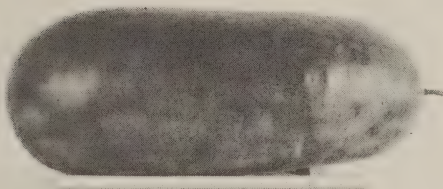

*Purple Top
White Globe*

Purple Top White Globe 57 days

The most popular variety for general planting. Roots round, 5 to 6 in. in diameter.

Shogoin or Japanese Foliage 42 days

Adapted to table use for roots and greens. Quick growing and supplies large, edible leaves and round, white roots. Flesh is white, and of excellent quality. Leaves 18 in., bright green. Especially popular in the South where it is replacing the Seven Top.

WATERMELON

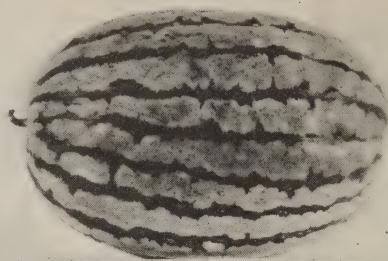

*Kleckley
Sweet*

Kleckley's Sweet No. 6 90 days

A fusarium wilt resistant variety of high quality developed by Dr. J. J. Wilson of the Iowa Experiment Station. Large cylindrical fruits, dark bluish green, with bright red, tender sweet flesh. Seed creamy with brown traces.

Tom Watson 90 days

Considered by many to be the peer of shipping melons. Oblong in shape, averaging 20 in. long by 10 to 12 in. in diameter and weighing 35 to 40 lbs. The skin is deep green. Flesh is red and the seeds brown.

WATERMELON

*Dixie
Queen*

Dixie Queen 85 days

Shipping type with thin tough rind. Prolific and of excellent quality. Fruits oval-round, light green with dark green stripes, weight about 30 lbs. Bright red, crisp flesh, with only few small white seeds.

*Black Seeded
Chilean*

Chilean Black Seed 85 days

Another splendid melon for home and market gardens. Fruits medium small, round, skin deep green, faintly mottled and striped with lighter shade. Flesh is crisp, fine grained and very sweet.

Pride of Muscatine 90 days

Same as Kleckley's Sweet No. 6 as described above.

Irish Grey 90 days

A white seeded, extra hard shell variety, 18 in. long and 11 in. thick. The skin is a mottled greenish-gray. Flesh is red, crisp, sweet and free from stringiness. Fruits are large and oblong in shape. Average weight 35 lbs. A very fine shipping melon.

INSECTICIDES—FUNGICIDES—FERTILIZERS HORMONES

Our stocks of insecticides, fungicides and fertilizers are very complete. Prices are competitive and we will give your mail orders careful attention. If you need some item not listed here, write us—possibly we have it or can get it for you. See our price list for sizes and values.

FLOWER SEEDS

Mainland flower seed growers have only planted 25 per cent of their pre-war acreage for the past three years—the other 75 per cent was used for much needed vegetable seeds. Conditions are slightly better this season. We have been able to purchase all the flower seeds listed on the following pages.

Flowers are divided into three classes—Annuals, Biennials and Perennials.

Annuals—Plants which, when grown from seed, mature, flower and die in one year. This class of flowers is easily raised and adapted to special uses such as bedding, borders, backgrounds, rock gardens, etc. Many annuals are excellent for cutting—fragrant and colorful. May be planted for a succession of bloom all summer.

Biennials—Plants which live two years, usually blooming only during the second year.

Perennials—Plants which, when grown from seed, usually begin blooming the second year, and continue to live and bloom each succeeding year. In some instances, these plants bloom the first year, from seed.

The following list comprises the more popular varieties and those we put up in lithographed packets, selling for 10c each, unless otherwise marked. We have many dealers throughout the Islands who have pledged themselves to keep their stocks of packets clean and fresh. Buy from the dealer nearest you. If he happens to be out of the variety you want, ask him to send for it. We pack and ship fresh seeds the day we receive orders. You can rely on our seed packets at all times.

Commercial Growers: We maintain adequate stocks of popular strains. All seeds stored at controlled temperatures so they will be strong and ready to plant when you are ready. Gladiola bulbs, grafted roses, berry bushes, asparagus roots, etc., all carried in season.

AGERATUM

Alyssum—Violet Queen

Ageratum (Floss Flower) Blue Perfection (Dwarf) 8 to 10 in.

A hardy annual growing 8 to 10 inches. One of the best summer blooming plants grown from seed. A prolific and constant bloomer even in the hot, dry summer months. Used for borders and bedding. Color rich blue.

ALYSSUM

Alyssum—Midget Blue 4 to 8 in.

Fine compact low growing plants with gray or gray-green foliage and showy heads of tiny flowers. Excellent for rock gardens and borders.

Alyssum—White 4 to 8 in.

Same as Midget Blue but with white flowers.

AMARANTHUS

Amaranthus, Mixed 3 to 4 ft.

Showy plants which thrive best in sunny positions. Very interesting flowers, crimson and scarlet in color.

ASTERS—Wilt Resistant

Improved Crego or Ostrich Plume, Comet 2 feet

This class of annual asters produces vigorous, branching plants bearing flowers with long, shaggy, twisted petals. They grow well on all Islands and are one of our most popular sellers. We carry stock of Crego Rose, white, lavender, dark blue or purple pink and mixed.

Aster Crego
Enchantress

Aster Crego
Mixed

BACHELOR'S BUTTON

Bachelor's Button, Blue Florists Strain

Centaurea Cyanus—also known as Corn Flower. An old fashioned hardy annual easy to grow. Foliage is plain but blooms are very attractive, excellent for a mass or border of gorgeous blue color in the garden and especially desirable for cut flowers. In bloom from early summer.

Bachelor's Button, Double Mixed

2 ft.

Similar to above only an attractive mixture of pink, red, maroon, blue and white flowers.

Bachelor's Button

BALSAM

**Balsam or Lady Slipper,
Double Mixed 18 in.**

An old-time popular hardy annual. Bushy plants grow rapidly and may be transplanted when of good size. Grow well in partial shade. The flowers are double as roses, frequently 2 inches in diameter. They are produced on short stems close to the central stalk. Leaves may be trimmed back if they hide the bloom. Plants require considerable moisture. Bloom in about 60 days.

CALENDULA

Calendula, Pot Marigold 18 in.

An old-time, hardy annual favorite which succeeds almost everywhere. Very showy in the garden and most attractive as a cut flower. Bushy plants. Blooms disc-like and very double.

Chrysanth, Orange King

An extra fine calendula, producing dark orange-red blossoms averaging about 3 in. across.

*Calendula
—Campfire*

Exquisite Mixed

All the double sorts in an excellent mixture producing flowers ranging through the various shades of orange and yellow.

CALLIOPSIS**Calliopsis** 2 ft.

Bright, showy, hardy annual, also known as Tickseed. Plants of easiest culture doing well in any sunny location, blooming all summer. Excellent for massing and cutting. Sow seed where plants are to grow. The tall mixed varieties are the most popular in Hawaii.

CANDYTUFT**Candytuft (Umbellata Mixed)** 1 ft.

This hardy early annual is one of our best plants for edging, bedding and cutting. They bear terminal clusters of small flowers, white, purple, pink, blue. Fairly rich soil, plenty of sunshine and moderate watering grow them best.

Candytuft, Hyacinth Flowered White 1 ft.

A hardy annual making an excellent border plant. Bears large bold spikes of white blooms, resembling a hyacinth in appearance.

Hyacinth Flowered*

CARNATION

Carnation, Chabaud's Mixed 18 in.

Tender perennial. Handle as an annual. Vigorous, erect plants produce beautiful double, clove-scented flowers of large size. Red and white mixed.

*Carnation—
Chabaud's*

CLARKIA

Clarkia Elegans, Double Mixed 2 ft.

A graceful and popular hardy annual which is excellent for borders, beds or cut flowers. Erect, bushy plants with attractive light green foliage. Rapid growers and constant bloomers. The stalks bear quantities of delicately colored double flowers in shades of red, white, pink and purple. Each stalk resembles a spray of Flowering Almond, and the blooms are placed axially along its length. Each bloom about $\frac{1}{2}$ inch across, resembling a small carnation. Does well in sun or partial shade.

COCKSCOMB

Celosia Plumosa $2\frac{1}{2}$ to 3 ft.

Deservedly popular annual ornamental plants. Generally they form pyramidal bushes branching out in candelabra shape with massive plumes waving gracefully above the foliage. The plumes can be dried for winter bouquets.

COREOPSIS

Coreopsis, Lanceolata
Grandiflora 2 ft.

This is the hardy perennial Calliopsis. Fine bushy plants. The bright yellow flowers, about $2\frac{1}{2}$ inches across, are borne on long, wiry, graceful stems. Blooms resemble daisies, and have broad fluted petals with ends attractively cut. They blossom over a long period and when cut are long-lasting. Plants usually flower the first year from seed.

*Cosmos—
Sensation Mixed*

COSMOS—Sensation Mixed

Cosmos, Sensation 4 to 5 ft.

This annual cosmos comes into bloom ten weeks after seed is sown. Produces largest flowers of any variety of cosmos in pink and white shades.

Cosmos, Orange Flare 3½ to 4½ ft.

One of the finest background plants and excellent for cut flowers—feathery foliage with large single orange colored blooms borne on long graceful stems. One of the better all-American selections. Early. A hardy annual.

DAHLIA**Dahlia, Unwin's Dwarf Hybrids, Mixed** 18 to 24 in.

Early flowering, tender perennial—double and semi-double blooms. While dahlias are usually grown from tubers, vigorous plants with excellent flowers can be produced the first year from seed started early in boxes and planted out after frost danger is past.

*Delphinium—
Bellamosa*

DELPHINIUM**Liberty Larkspur** 24 in.

These lovely Larkspurs will bloom the first year. Ferny foliage, dark blue color, graceful sprays crowded with blooms.

Bellamosum 36 in.

A loosely branching variety with flowers of deep indigo-blue.

DIANTHUS**Pinks or Dianthus, Double Mixed**

1 ft.

An old-fashioned hardy annual which is very popular for massing, borders and for cutting. Stems are of good length for cutting. Flowers are often 2 inches across. Crimson, rose, maroon, salmon, lilac. Leaves are narrow and bright green. This is one of the most colorful, easily grown, and generally useful annuals we know of. Thrives in most any garden soil and usually survives the most adverse conditions. The double sorts are nearly as fine for cutting as carnations. Many of the varieties are fragrant.

*Dianthus
—Mixed*

FORGET-ME-NOT**Forget-Me-Not, Myosotis Alpestris** 8 to 12 in.

Beautiful little half hardy perennial plants suitable for borders, rock garden planting or potting for indoor decoration. If seeded in early spring, it will bloom the first year, or it may be sown in summer or early fall for blooms the next summer. To carry over the winter it must have protection. Moist and somewhat shady situations are required. The dainty, five petalled, blue flowers make their appearance in early Spring.

FOUR o'CLOCK

Four o'Clock, Marvel of Peru 2 ft.

A tender perennial which is usually treated as an annual. Compact, bushy plants suitable as a hedge or low screen. The brilliant, tubular flowers open about four in the afternoon and remain open until the next morning. Grow in almost all soils and in unfavorable weather. Sweet scented.

GAILLARDIA

Gaillardia, Single and Double Mixed (Blanket Flower) 18 in.

A very popular hardy annual. Large heads of bright yellow and red flowers, many double with quilled petals. Suitable for bouquets. Should be sown where plants are to remain. Bloom from early summer until late in Fall.

GYPSOPHILA

Gypsophila Elegans Gr. Alba (Baby's Breath) 2 ft.

A hardy annual, improved strain, with panicles of single, star-shaped white flowers. Much in demand for cutting and combining with other flowers for bouquets, etc. Thrives almost everywhere.

Helichrysum or Everlasting

HELICHRYSUM

Everlastings, Helichrysum, Double Mixed 2½ ft.

A beautiful, hardy annual everlasting. Flowers are very attractive when growing, and make exceptionally attractive winter bouquets if cut when partially open and dried in a cool place, heads downward. The centers of the double pompon-like flowers are nearly covered by the stiff overlapping petals, with the stiff, pointed, outer petals growing in saucer shape. A wide range of brilliant and soft colors.

Hollyhock

HOLLYHOCK

Hollyhock, Single Mixed 5 to 8 ft.

A hardy biennial of upright growth, unequalled as a background or screen. The beautiful long spikes filled with blooms, 3 inches across and growing close together on the stalks, make a dazzling display. Given rich soil and a location where plenty of water can be supplied, hollyhocks will grow and bloom freely for years as they reseed themselves. Colors: Scarlet, maroon, rose, yellow, pink, white.

LARKSPUR

Larkspur, Giant Imperial or Base Branching, Los Angeles 4 ft.

An annual larkspur with salmon rose bloom in spikes. Excellent for cutting.

Larkspur, Giant Imperial or Base Branching, Blue Spire 4 ft.

Annual, with spreading branches, producing fine spikes of dark blue bloom.

Larkspur, Giant Imperial or Base Branching, White Spire 4 ft.

Annual, with spreading branches producing fine spikes of pure white.

Larkspur, Tall Double Stock Flowered, Mixed 3 to 4 ft.

Very popular annual of branching growth and with soft green finely cut foliage and tall spikes of blue, pink and white flowers.

LOBELIA

Lobelia Compacta, Crystal Palace 4 in.

A hardy annual with dark stems and leaves tinged with reddish brown. Blue flowers somewhat resembling tiny butterflies. Excellent for edgings and rock gardens.

MARIGOLDS

Marigold, Harmony 12 to 14 in.

An annual dwarf French Marigold having scabious-like flowers of deep orange with maroon collars of broad petals, crested centers. Usually free flowering and very early.

Goldsmith 2 to 3 ft.

Extra large flowered golden orange; good stems for cutting. Bushy, base branching plants.

Yellow Supreme 2½ ft.

Giant perfectly formed flowers with broad, overlapping petals, so arranged that the bloom closely resembles a carnation. The color is a soft clear shade of moonlight yellow.

Marigold, African Mixed 2½ ft.

A hardy annual of dense, bushy habit with finely cut bright green foliage. The blooms are large, frequently 3 inches across, globular in shape, composed of a compact mass of tubular or quilled petals in very regular arrangements. Predominating shades are orange and lemon. A very satisfactory garden flower for summer and autumn. Also excellent for cutting, but emits an extra pungent odor if stems or flowers are bruised.

Marigold—African Orange

Same as above. Large deep orange flowers.

Marigold—African Lemon

Same as mixed but only light delicate lemon blooms.

Marigold— Tall African

MORNING GLORY

Morning Glory, Heavenly Blue

10 to 12 ft.

A hardy annual vine which grows rapidly. Heart shaped, green, glossy leaves with clear sky-blue blooms having cream colored throats. Thrives best on light soils.

Morning Glory—Pearly Gates

This admirable climber is identical with the older favorite, Heavenly Blue, but large white flowers.

NASTURTIIUM

Nasturtium, Dwarf Mixed 12 in.

This low-growing sort, also known as "Tom Thumb," is used mainly for bedding borders and boxes.

Nasturtium, Tall or Running, Mixed 5 ft.

This sort produces the largest and finest formed flowers. It is used to best advantage on trellises, walls, fences, etc.

Nasturtium, Scarlet Gleam 2 to 3 ft.

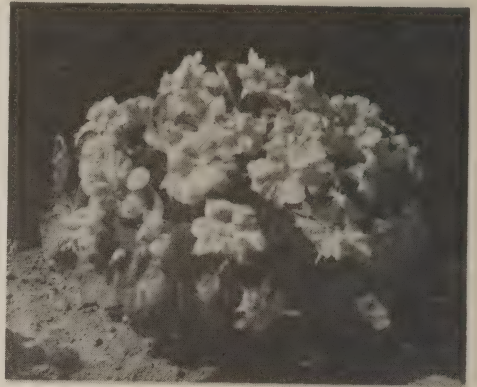

A tall annual variety with double fiery scarlet bloom, sweet scented.

Nasturtium, Golden Gleam 2 to 3 ft.

A medium tall nasturtium with golden yellow bloom and a petal arrangement which gives the appearance of a double flower. Very fragrant. Flower stems long, making this variety excellent for cutting.

Nasturtium, Double Gleam Hybrids, Mixed 3 ft.

The double or semi-double, sweet scented annual nasturtium that is now so popular. The fragrant blooms are carried on long stems. The mixture includes scarlet, yellow, orange and salmon.

*Nasturtium—
Golden Gleam*

PANSY

Pansy, Swiss Giants, Mixed 6 to 8 in.

Perennial. Large round flowers in exceptional range of colors including red-browns. Bloom early in Spring and continue until late Fall.

PETUNIA

Petunia, Hybrida, Mixed 18 in. to 2 ft.

A mixture of medium size sorts, with profuse blooming habits. Bushy plants for massing in beds or for use in flower boxes, urns, etc. Trumpet or tubular shaped flowers about 2 inches across. Bloom 2 months after seedling and continuously until frost. A wide range of colors.

Petunia, Hybrida, Flaming Velvet 18 in to 2 ft.

Same type as above only flowers are a deep blood-red.

Petunia, Hybrida, Blue 18 in. to 2 ft.

Plants of the same sort as described under Petunia, Mixed. This sort produces flowers of one color, a deep violet blue.

PETUNIA

**Petunia, Hybrida, Violacea,
Velvet Blue** 11½ ft.
Annual. Blooms of deep, velvety, violet-purple.

**Petunia, Nana Erecta,
Rosy Morn** 14 in.
Annual. Blooms of rosy pink with large white throat.

*Petunia —Pink***PETUNIA—Pink**

**Petunia, Hybrida, Pink
(Rose of Heaven)** 18 in. to 2 ft.
Similar to Petunia Blue except that color is a clear rosy pink.

PHLOX

Phlox, Drummondii, Mixed 12 in.
A hardy annual producing bushy plants carrying many broad, flat-topped clusters of disc-like, five petalled flowers, each about three-fourths inch in diameter. They are especially enjoyed for their brilliant colorings and length of blooming period. Excellent for beds and borders. Succeed in almost any sunny location.

*Phlox—New Art Shades***SALVIA**

Salvia Splendens, Bonfire 2 ft.

A tender perennial but generally used as an annual. Also known as Scarlet Sage. This particular variety is dwarf, compact and brilliant scarlet. Plants are bushy and covered with countless spikes of tubular florets from late July until frost. The bright scarlet color makes this plant very desirable for beds, borders, boxes, etc.

SHASTA DAISY

Shasta Daisy 2 ft.

Excellent hardy border plants, perennial, producing a profusion of large, white daisy-like blooms with yellow centers.

**Your plants need food just as
any other living thing.**

We recommend

VIGORO

SNAPDRAGON

Snapdragon, *Antirrhinum*,
All Colors Mixed 2 ft.

A hardy annual which is admired by everyone and easy to grow almost everywhere. Colors gorgeous and varied and include copper, crimson, yellow, red, white. Few flowers can match snapdragons. The long spikes bearing the large, fragrant, interesting blooms may be enjoyed all through the Summer and Fall if the seed pods are nipped off. Excellent for bedding and cut flowers. Easily raised from seed in good soil and in a sunny location.

Snapdragons

SWEET PEA

The SPENCERS are prime favorites in Hawaii. Vigorous growers and prodigious bloomers. Do not do well at lower levels but produce nicely in the cooler districts.

We carry the following early Spencer colors—

Spencer Dark Blue
Spencer Orange
Spencer Lavender
Spencer White
Spencer Mixed

Sweet Pea
—Spencer

We are Territorial Distributors for

HYPONEX

A complete plant food, containing all the ingredients necessary for a vigorous and balanced plant growth. In fact, it is so accurately balanced it will grow superior plants in the poorest soil—or even in sand, cinders or water, without soil.

HYPONEX is a clean, white, odorless powder that dissolves immediately in water and becomes available to plants as soon as it is applied at any stage of their growth.

SWEET SULTAN

Centaurea Imperialis, Giant Sweet Sultan $2\frac{1}{2}$ ft.

A beautiful, sweet scented annual flower for cutting. The blooms have deeply fringed petals closely held in rounded calyxes. They are borne on long, strong stems and if placed in water, after cutting, will last for several days.

SWEET WILLIAM

Sweet William, Single Mixed $1\frac{1}{2}$ to 2 ft.

One of the old popular hardy perennials. The large trusses of brilliant flowers are delightful in any garden. Require a good, rich, well fertilized soil for best results. The broad clusters of fragrant flowers are like little pinks with delicately fringed, overlapping petals. Color range, pink, scarlet, maroon, white, usually two shades to each plant. Fine for cut flowers.

Verbena

VERBENA

Verbena, Hybrida, Mixed 1 ft.

A free flowering tender perennial, usually treated as an annual. Excellent for bedding and edging. Of creeping habit with dark green foliage. Many clusters of large star-shaped flowers with round lobed petals. Color range—blue, pink, scarlet, yellow, white—most of the flowers having white eyes.

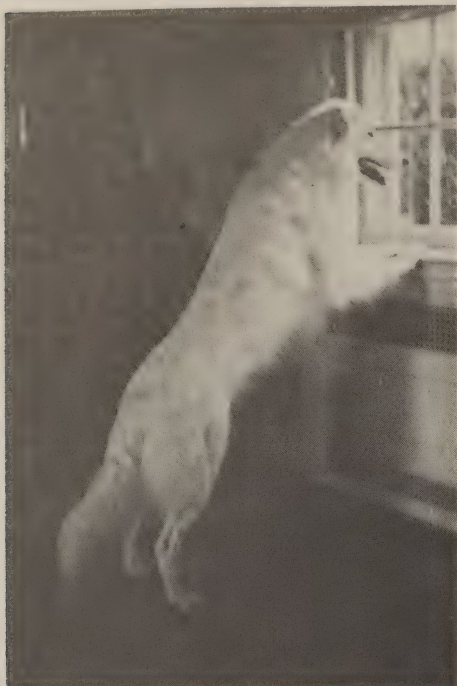

ZINNIA

Zinnia—Dahlia Flowered Mixed

Dahlia Flowered, Mixed $2\frac{1}{2}$ ft.

Very large, robust, branching plants producing large blooms which resemble Decorative Dahlias—often measuring 3 to 4 inches deep and 5 inches across. The flowers usually have slightly hollowed centers ringed with tubular petals. The petals over the flower have a tendency to curl inward.

Dahlia Flowered—Orange
Dahlia Flowered—Rose
Dahlia Flowered—Scarlet
Dahlia Flowered—Mixed
